

Code-versions

kjx version	Status
2,00	first setup-version
2,01	earlier setup-version
2,02	earlier setup-version
2,03	earlier setup-version
2,04	skipped
2,1	latest setup-version
2,2	current development

Code-changes

Version	Change
2,02	enable drag-n-drop to re-link tree-items
2,02	color-coding of tree-items based on the change-field and date
2,02	facilitating the setting of the tree-depth by extra buttons
2,02	set focus after button click New
2,02	Database import – you can import data from older (or current) databases to the latest version
2,02	optionize branche-tree-depth of thruport (to determine the number of exported levels to you mobile)
2,02	Database import – reset auto-numbering to 1
2,02	button Reread becomes Load lists
2,03	some comboboxes (not all yet) were made read-only
2,03	Clear-button for the change-field to one-click erase this field
2,03	improved status-info on drag-and-drop
2,03	Re-arranged some nav-panel-controls to minimize cursor-movements
2,03	Menu-entry to check for updates
2,03	introduced program-linked settings-database (known as system-settings)
2,03	new option Startup-database in system-settings
2,03	improved both system- and database-settings
2,03	Added 4 custom-views that can be saved and reloaded by the user
2,1	query-possibs for flat-filtering data
2,1	query-possibs for flat-filtering on branches (combined filtering)
2,1	multiple users are now differentiated thru the field Source
2,1	multi-user – default source can be set in the options
2,1	multi-user – the calendar / task-list can be filtered for specific source or user
2,1	multi-user – workflow-management also now possible thru source-field
2,1	overall performance improved (query-speed)
2,1	added date-modification buttons for count-up and count-down of the date
2,1	all link-updates are checked by default now in the modpanel
2,1	minor gui-change in mod panel

Database-versions

Knobjex-version	Database-implementation	sqlite_version
2,00	102,00	3.6.10
2,01	102,01	3.6.10
2,02	102,02	3.6.10
2,03	102,03	3.6.10
2,10	102,10	3.6.10
